

ANIMAL NURTURE

Promoting holistic pet care for quality and quantity of life.

'GOE'

Green - Grease and Odour Eliminator

Product Information

- Formulated using a unique blend of naturally occurring enzymes, polysaccharides and electrolytes.
- Environmentally friendly, multiple enzyme degreaser, cleaner and odour controller. Eliminates odours at source rather than masking them.
- Changes the molecular structure of the host environment, digesting contaminants and speeding up natural biodegradation.
- Eliminates ammonia and hydrogen sulphide from animal waste.
- Totally safe around children, pets, horses, livestock and poultry.
- Safe for plumbing, degreases drains and promotes breakdown of hair/fur.
- Western Australian manufacturer and exported internationally.
- Safe for septic, in fact increases efficiency.
- GOE has been approved by the Australian Pesticides and Veterinary Authority (APVMA) where its use is to eliminate odours and by the Australian Quarantine Inspection Service (AQIS) and approved for use under category 1 as a General Cleaner in export registered meat establishments.
- GOE has received Environmental Choice Accreditation in Canada and is currently being reviewed to receive reciprocal accreditation in Australia.

Two formulations available from **Animal Nurture**

Wash Down GOE—particularly efficient in cleaning and deodorizing; used in catteries and kennels (Swan Animal Haven, South Guildford; RSPCA, Malaga); suitable for spot spraying of cat and dog urine. Can be used for general indoor cleaning - stainless steel, floors, toilets, etc. Can be diluted to suit use.

Bio GOE—particularly useful in stables (used by the WA State Equestrian Centre), poultry farms, livestock facilities, and sewerage settling ponds. Dilute to suit use.

Pet Uses

- Eliminates urine odour. Use diluted.
- Cleans—breaks down grease and organic matter.
- Reduces bacterial count by digesting contaminants required for bacterial growth.
- Dogwash—1/4 cup in 4 litres of water.
